Education

Colby College 2026–2030
Full Scholarship (INR 3.2 Crores), 1/10 Pulver Science Scholars (providing 2 guaranteed research opportunities.)

The Hyderabad Public School, Begumpet 2022–2026
Academic Scores and Olympiads: 98.4% ICSE (Highest Aggregate in School and AIR 8), AAAA and predicted A in AS Levels (Further Math, Physics, Chemistry, Economics, and English General Paper), Predicted A*A*A*A*A* in A Levels (Further Math, Physics, Chemistry, Economics, and Math (self-studying)), 1560/1600 SAT (800 Math, 760 Reading and Writing), Class Rank 1 across 4 years, School and Regional Ranks in SOF Math Olympiad and National Science Olympiad, National Rank 2 in Taramandala National Science Talent Search, ISRO Astronomy Olympiad Commendation. **Leadership:** Deputy Headboy of 4000+ students, budgeted for school events (earning INR 1.2 lakhs profit), President of 30+ member STEM Club.

Experience

Founder, KalyanSarathi June 2024–Present
- Developed a bilingual AI chatbot, called KalyanSarathi, that advises users on government schemes they are eligible for and helps them apply.
- Improved awareness about schemes for 300+ people, granting them access to benefits worth INR 30 lakhs.
- Programmed a fully TTS-STT enabled Android app that was recognized by the Ministry of Rural Development, Government of India.

Research Science Institute India (RSI-I), IISc Bengaluru Jun–Jul 2025
- Selected as 1 of 31 students nationally by the Center for Excellence in Education.
- Conducted research in chemometrics at the Indian Institute of Science, Department of Biochemistry, under the Department Chair, Professor Utpal Tatu.
- Developed a novel machine learning and Raman spectroscopy method to detect the presence of *S. aureus* bacteria in milk samples.
- Received the award for Best Oral Presentation at the RSI Colloquium.

Fellow, Global Public Policy and Leadership Fellowship Aug 2025–Aug 2025
- Selected for a fellowship with an 8% acceptance rate.
- Mentored by senior employees at the World Bank and the Czech Foreign Ministry.
- Wrote a white paper titled "Evaluating the Current Asylum System for Climate Refugees and Recommendations to Create a Global Policy" that combined policy analysis with differential equations to model refugee flows.

Student Lead, Decarbonize Initiative Aug 2024–Nov 2024
- Selected to participate at COP29 in Baku, Azerbaijan, and granted access to the Blue Zone as a UNFCCC delegate.
- Presented the Global Child Manifesto in 2 panels at COP29 and personally pitched it to dignitaries, including the Canadian Climate Ambassador and the Director of IUCN.
- Conducted a study on the carbon sequestration capacity of The Hyderabad Public School, Begumpet, and presented the findings at the panels and the COP29 Science Fair.

Fernandez Hospital, Hyderabad May–Jul 2024
- First author of paper titled "Early Phototherapy Prediction for Neonatal Hyperbilirubinemia: A Machine and Deep Learning Based Approach," under review at *BMC Medical Informatics and Decision Making.*
- Built data scrapers to collect data, analyzed patient data, and built the ML model achieving 86% accuracy, a first of its kind for Indian neonates.
- Performed interpretability analysis, which led to the discovery of Cord TSH as a biomarker for severe hyperbilirubinemia.

Volunteer, People+AI and HaqDarshaq Aug 2024–Mar 2025

- Contributed to the mission statement and worked on DigiForm, a tool for automated form filling for illiterate and semi-literate individuals.
- Developed software for generating summaries of updates to government schemes for HaqDarshaq using LLM APIs. The software has been deployed for 660K+ users of the platform.

Editorial Intern, One Young India Apr–Jun 2022

- Wrote video scripts and conducted research for 2 videos on "Private Military Contractors" and "Oil Politics" that generated 500+ views.
- Authored a three-part Medium series on prediction in geopolitics and global economics. The articles were titled: "After London: The Search for the Next Global Kleptocratic Hub," "The Coming African Spring: Why the Sahel May Be Poised for Revolution," and "The Arctic: The Next Frontier in the US-China Rivalry."

Awards and Honors

- IRIS National Science Fair and ASTRYC – National Finalist (2025, 2026)
- John Locke Essay Competition (Economics) – Commendation and Invitation to Oxford Gala (2025) [Essay]
- Queen's Commonwealth Essay Competition – Silver Prize (2022)
- 20+ awards in Debate, MUN, and Theatre (including IPSC and ASISC) (2022-25)

Skills

Programming: Python, Scikit-learn, PyTorch, TensorFlow, Pandas, NumPy, Kotlin
Technical: Statistical Modeling, Bioinformatics, Mathematical Modeling, AI/ML, Android App Development
Tools: GitHub, Data Pipelines, LLM Applications
Other: Research Writing, Public Speaking

Interests

Geoguessing, Cryptography, Mechanistic Interpretability of LLMs, History, Computational and Mathematical Biology, Equestrian Sports.
